

PORT FOLIO

BY. ALIDA EKSTEEN

WELCOME

I am a highly creative Design Engineer, Art Director and Senior Designer with experience across print, digital media, branding and user-focused digital products. My work combines strong visual design with practical technical skills in UI/UX, web development, e-commerce, mobile app design, digital marketing and copywriting. I am proficient in both Mac and PC, an Adobe Certified Specialist, and have completed professional training in iOS and Android mobile app development, UX/UI engineering, digital marketing and copywriting. I bring a design-led approach to every project, creating work that is visually strong, user-friendly and built to support real business goals.

VIDEOGRAPHICS

VIDEOGRAPHICS

This advertisement features a woman in a blue shirt and dark apron, smiling and looking at her smartphone. The background is a blurred indoor setting. A notification banner at the top reads "You have new booking requests" with a red bell icon and a red circle containing the number "1". A green box on the right contains the text "Are you a CLEANER looking for work?" with a small icon of a person cleaning. Below this, it says "Download the app, register your FREE account and get jobs sent right to your phone!". At the bottom, there are logos for the App Store and Google Play, and the website "findmyhelper.info".

CORPORATE

frontier

Transforming Investment Services with
Innovation, Insight, and Integrity

FRONTIER PROSPECTUS

frontier

Frontier is a leading provider of integrated investment solutions, offering advanced technology, data analytics, and consulting to global clients such as asset managers, administrators, and financial institutions.

With over 20 years of experience in financial mathematics, compliance, and software engineering, Frontier delivers secure, efficient tools for investment risk management, compliance, and portfolio analysis.

FRONTIER INVESTMENT SERVICES

PORTFOLIO WAREHOUSING & RECONCILIATION

The Company provides secure, automated systems for the comprehensive management of portfolio data, encompassing storage, reconciliation, and administration. These systems are engineered to ensure data integrity and optimize operational efficiency for our clients.

NAV CONSTRUCTION & MAINTENANCE

Service encompasses the precise computation of Net Asset Value and its continuous updates, specifically structured to conform to the varied architectures of different fund types and the explicit demands of regulatory authorities.

VALUATION & PNL

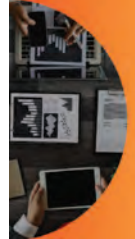

Our proprietary Dendora Technology Block underpins the provision of robust valuation methodologies and detailed Profit & Loss analytics, thereby ensuring consistency and transparency in financial reporting and analysis.

COMPREHENSIVE REPORTING

Frontier provides comprehensive performance metrics and analytical insights through customizable reports. The platform aggregates multi-asset portfolio data for daily monitoring of returns, risk, and compliance, and delivers reports in various formats for seamless integration with client workflows and internal decision-making.

INTERSHIP PROGRAMME

Frontier's six-month Fund Administration Internship is open to B.Com and B.Sc. students in finance-related fields, offering supervised exposure to risk analysis, compliance reporting, portfolio evolution, and general financial mathematics.

FRONTIER ANALYTICS

RISK & VALUATION ANALYTICS

Frontier delivers specialized services in advanced risk modeling and financial calculations, employing techniques such as Value-at-Risk computation and multifactorial scenario analysis, provided through the requested responses of our financial mathematics professionals.

COMPLIANCE AND REGULATORY SERVICES

Frontier delivers robust compliance solutions tailored to diverse regulatory needs, covering SMOG, SMOG, Regulation 28, ASFA standards, AFML and more. Our services help clients stay aligned with current and evolving regulations, including specialized support for complex requirements like CFC derivatives and foreign-sourced derivatives rules.

CUSTOM ANALYTICS

Frontier's Custom Analytics offers advanced data insights and operational control, including on-demand compliance requests with automated workflows. Clients can use interactive P&L visualizations and risk data by counterparty, instrument, or jurisdiction. Video-based views ensure tailored data access for managers, compliance teams, and auditors. The platform features automated alerts across all asset classes, thereby ensuring compliance monitoring with instant alerts, and interactive dashboards for real-time risk and regulatory tracking.

FRONTIER TECHNOLOGY

DERIVATIVES SYSTEMS

Frontier provides a unified platform incorporating front, middle, and back office functionalities for effective derivatives management. These capabilities extend to essential transaction lifecycle processes such as automated trade capture, pricing allocation, and thorough reconciliation.

FINANCIAL INFRASTRUCTURE SYSTEMS

Our offering encompasses a range of essential infrastructure solutions, such as robust messaging and matching engines, specialized trading systems, and various other operational platforms designed to enhance the streamlining of financial processes for our clients.

INVESTMENT MANAGER SOLUTIONS

The Company provides adaptable trade reporting solutions, robust allocation systems, and sophisticated pre-trade compliance mechanisms. These offerings are engineered to enhance operational efficiency and to support clients' demanding requirements for applicable regulatory requirements.

BANKING TREASURY SYSTEMS

Established treasury solutions, adopted by prominent banking institutions, are tailored to support rigorous regulatory harmonization and comprehensive supporting capabilities.

FRONTIER TECHNOLOGY

TRADE STAGING & PRE-TRADE COMPLIANCE

Frontier's Trade Staging Tool offers a secure platform for pre-valuation reconciliation, with integrated compliance checks against frameworks like SMOG, SMOG, and Regulation 28. Automated rule enforcement covers restricted lists, blacked-out periods, and insider trading prevention. The tool also provides real-time trade alerts, advanced user permission management, and comprehensive, customizable dashboards enabling compliance officers to proactively identify and address high-risk transactions before execution.

DENDORA TECHNOLOGY STACK

The Dendora Technology Framework, developed and refined over two decades, delivers robust reliability and operational adaptability. Its architecture is highly modular and rigorously tested, ensuring seamless integration with heterogeneous clients while maintaining essential backward compatibility. The also incorporates advanced multithreading for efficient integration with existing mathematical models, thereby ensuring the core of all Frontier solutions, supporting harmonization for Asset Value calculations to comprehensive compliance reporting.

WHY CHOOSE FRONTIER?

Frontier stands out with custom-built, in-house technology, resulting in superior integration, robust security, and comprehensive human resource, and rapid response to client needs. Our unified system platform enables clients to leverage a wide range of tools that a single vendor can't provide, ensuring that clients can respond to any situation, reducing both efficiency and cost.

The technology ecosystem is centered with a client-centric approach, offering a secure, reliable, and scalable platform, ensuring a consistent and transparent client experience. Further, the platform is designed to support the most demanding compliance requirements, ensuring high client satisfaction, security, and responsiveness to a rapidly changing regulatory environment.
